

User Manual

Pharmix

Name: Pharmix

Titulars: Andrea Contreras, Alba Casado, Paola Amor and Alex Martínez

Description: the project uses a text menu bases user interface in the console, with a main menu and submenus (medicines, clients and sales) that allows the user to easily access and manage all the system's functionalities

1. Main menu

The main menu is the entry point of the application. From here, the user can:

- manage medicines
- manage clients
- manage sales
- view general information (stock, sales, etc.)
- save/load data
- exit the application

2. Medicine Management Menu

This submenu allows the user to manage the oharmacy stock:

- add a new medicine
- search for a medicine by name or code
- update medicine information (price, stock, etc.)
- delete a medicine
- display all medicines

3. Client Management Menu

This submenu allows the user to manage clients:

- add a new client
- search for a client
- delete a client
- display all clients

4. Sales Management Menu

This submenu allows the user to manage sales:

- register a new sale
- view sales history
- show details of a specific sale

5. Input Screens

The user will introduce data through the keyboard when performing actions such as:

- medicine name, price, and stock
- client name and ID
- sale details (medicine, quantity, etc.)

5. Output Screens

The system will display:

- confirmation messages (e.g., "Medicine added successfully")
- error messages (e.g., "Medicine not found")
- lists of medicines or clients
- sale summaries and details

STEPS

The flow of the application is the following:

1. The program starts by displaying the main menu.
2. The user selects one of the main sections (medicines, clients, or sales).
3. Inside each section, the user accesses a submenu to perform specific actions.
4. After completing an action, the system returns to the same submenu so the user can continue working.
5. The user can return to the main menu at any time.
6. Before exiting, the user can save the data.
7. This structure ensures a logical and intuitive navigation through the application

REQUIREMENTS

	Responsible	Severity	Priority
Maintain a list of all medications across pharmacies in Madrid	Development Team	High	High
Allow filtering of medications based on search criteria	Development Team	Medium	High
Verify sufficient database storage for new entries	Development Team	Low	Medium
